long:

PEACE OF SCHMUCK is a young, independent jewelry label from Germany.

Contrary to today's society tendencies, Julia's designs are all about one thing: embracing and celebrating individuality & sustainability. Each one of the jewelry pieces explores this concept and shall keep you company for a long time. The designs

are distinct and inspired by different cultures, experiences, and stories and are mainly manufactured from upcycled materials.

We LOVE how differently our designs are being worn, how every person adds their very unique style to the pieces and that they can help express them who they want to be.

Tell your story: Your jewelry. Your Style.

WHAT'S YOUR STORY?

**Be What You Are. Be Exceptional.**
